

## Programming Assignment #2

**Evaluation Date: 10<sup>th</sup> September, 2018**

Given 3 circles  $X$ ,  $Y$  and  $Z$  use scan fill algorithm to color  $X \cap Y \cap Z$  with RED,  $X \cap Y - X \cap Y \cap Z$ ,  $Y \cap Z - X \cap Y \cap Z$ ,  $Z \cap X - X \cap Y \cap Z$  with BLUE, GREEN and YELLOW respectively and the remaining with CYAN. Your code should also handle the cases of three non-intersecting circles and only two circles intersecting.
